Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/574,771	Applicant(s) WOLF, WALTER	
	Examiner LIVIOUS R. CAZAN	Art Unit 3729	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, drawn to a method for manufacturing a component.

Group II, claim(s) 19-25, drawn to a device for manufacturing a component.

Group III, claim(s) 26-39, drawn to a component.

Group IV, claim(s) 40-44, drawn to a various uses of a component.

2. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed to a method comprising lining the inner wall of a base body with plastic such that a cavity is formed between a connection point of the base body and the plastic.

Group II is directed to a device comprising a shaping and/or joining tool with a shaping element.

Group III is directed to a component having plastic provided on inner walls such that a cavity is formed between the plastic and connection points of the base body.

Group IV is directed to various uses of a component made by the method of claim 1.

Unity is lacking between groups I, III, and IV and group II. The particular method of group I or the product(s) of group III or IV do(es) not require use of the particular device of group II, and the device of group II is a tool having a shaping element, which, as claimed, can have other uses, it does not only have a function in forming the claimed cavity. As for groups I, III, and IV, they all have as a special technical feature the plastic provided on inner walls such that a cavity is formed between the plastic and connection

points of the base body. However, this structure is not deemed, *a priori*, novel, and groups I, III, and IV therefore lack a common or corresponding special technical feature. This assumption will be reevaluated at the time of the search, i.e. if no art is found which teaches this structure.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
